# ML-20IP

Outdoor panel  
style and functionality

ML-20IP is a unique video doorbell which gives you an ability to receive the call on the smartphone.

A call from the doorbell can be received by all the homeowners— devices simultaneously (iOS and Android). Also, using a cell phone or PC, you can see what happens nearby. By means of software motion detector everything that gets in the secured area will be automatically recorded on the memory card.

ML-20IP can be used as an autonomous video doorbell or as an outdoor video panel for four-wire intercom, then the call will come both to the intercom and the application on a mobile device.

Model: **ML-20IP**

## Characteristics:

### DEVICE TYPE

Individual IP outdoor panel
