

Access Control Made Easy

ACW2-XN

Web-based access control
for smaller facilities

Access control isn't too expensive

Not moving with the times can be

Why Update Your Approach to Access Control?

Businesses and other non-residential concerns are four times more likely to be burglarized than homes. Traditional lock and brass key systems, contact or low frequency contactless systems are easy to compromise and expensive to maintain for smaller businesses.

- 75% of employees have stolen at least once from an employer
- Globally, dishonest employees are behind about 28% of inventory losses

HID Global's web-based access control for small facilities, ACW2-XN, provides complete access control, neatly packaged within a secure metal housing.

ACW2-XN has been developed to meet the specific needs of business owners, without incurring the high expense of an enterprise based access control system.

Save time and money with everything required to secure an office, coffee shop, small factory or retail store in one package.

Benefits

- No risk of copied or lost keys
- Customize who has access, where and when
- Keep track of employee's working hours
- Records all transactions (audit trail)
- Protect equipment, stock or documents

- Improves fire safety, by knowing who's in the building
- Secures the business 24-hours a day, 7 days a week

Simple to Install

ACW2-XN comes prewired, with built-in intuitive software, enabling the access control system to be up and running in minutes.

A simple three step procedure guides users through the enrollment process, setting up doors and creating access ensuring the business is quickly and effectively secured.

Grows with You

ACW2-XN is an expandable system, which seamlessly scales as your business grows.

The basic system accommodates up to two doors. It can be easily expanded to accommodate up to eight doors with additional expansion modules and door readers. The system automatically recognizes the additional equipment and the built-in wizards will guide the configuration process.

The result is a significantly lower cost of ownership and minimal disruption to the business.

Leverages Mobile Technologies

Smartphones are the go-to technology of our day. ACW2-XN has harnessed this transformational technology, providing unrivalled convenience, security and accessibility through a mobile device.

Via smartphone, users can access the system to remotely control access, or simply view a report.

Secures the Premises

Business owners regain complete control over their premises with ACW2-XN. The security risk associated with brass key and lock solutions easily copied, lent, lost or compromised by thieves, are mitigated.

Through ACW2-XN the entrance to a building, office, stock room, or security-sensitive area can be restricted to specific employees, during stipulated hours.

Provides 24/7 Control

Embracing new web-based technologies allows business owners to have control of their premises with the click of a button through the intuitive online portal.

Changes in employment status can be quickly and easily undertaken. Access rights are easily provisioned and revoked.

Quick-access buttons allow for the immediate opening or the securing of all doors, in the event of an emergency solution.

Business Reports

ACW2-XN provides reporting for time & attendance or access audits.

Hassle-free features:

- No computer necessary
- Pre-wired and configured
- Scalable from one to eight doors

- Low maintenance
- Five year warranty
- Free on-demand training

Who Should Use ACW2-XN?

ACW2-XN is designed to serve the needs of small facilities wanting to improve security, and reduce business risk.

Enable quick, convenient access, connect securely over-air and better manage the risks of unauthorized access.

ACW2-XN's ability to scale from one to eight doors is ideal for offices, retail stores, small hotels and bed & breakfast establishments, factories, and more.

This offering is available in select countries only. Contact your local HID Global Partner to inquire.
