

Product Features

The MORX06 boom barrier is designed for wide entrances up to 6 meters, making it the perfect solution for managing vehicle traffic in parking lots, private access points, industrial areas, and public spaces. Featuring an interactive LED chassis, a programmable control panel, and a high-efficiency Brushless DC motor, it offers fast operation, reliable performance, and versatile functionality. With its advanced design and robust features, the MORX06 is a comprehensive and efficient barrier gate solution.

-  DC 24V brushless motor with encoder
-  Embedded programmable controller
-  Automatic obstacle detection
-  Reversible boom direction
-  Backup battery connection
-  Adjustable angle of rise/fall
-  Adjustable opening & closing speed
-  Barrier arm's length from 3m to 6m
-  Streamline casing with LED
-  Emergency opening
-  Automatic delay closing

Specification

Product Name	MORX06 Boom Barrier
Voltage	220 ~ 240V
Motor Type	DC 24V brushless motor
Power	90W
Arm length	1 ~ 6 mtr
Arm Gate Material	Aluminum Alloy
Size of Housing	405 * 292 *1019 mm
Housing Material	Galvanized Plate
Remote control distance	30 mtr
Rail Lifting Time	5 second
Working Temperature	-25 °C ~ 80 °C
Working Humidity	5% ~ 95%
Warranty	1 year
MCBF (Mean Cycles Between Failure)	≥ 3,000,000 times
Chassis Weight	45 Kg

Feature :

- High performance motor
- Ultraviolet-proof surface treatment
- Modular design
- Laser cutting body
- High level water proof
- High compatibility
- Various kinds of color choice
- Perfect structure design, value every detail in the process of manufacturing.
- Strict inspection system ensures products quality, to protect customers' profit based on low failure rate and low maintenance cost.
- Prompt and professional after-sales service and technology support.
